Task Manager

A simple app for organizing everyday tasks

?? Purpose

Create, organize, complete, edit, and delete work or personal tasks.

?? Navigation flow / screen map

Three tabs with task detail and add-task flows.

?? Task Manager

View tasks, open details, use + Add task.

?? Insights

See completed, remaining, and priority summaries.

?? Settings

Choose ?? Light, ?? Dark, or ?? System.

?? Task Details

Opened by tapping a task. Edit or delete it.

?? Flow

Home ? + Add task ? fill form ? Save task Home ? tap task ? Details ? Edit / Delete

??? Main screen designs

Five implemented experiences.

?? Task Manager

Today's focus ? 1 of 4

My tasks + Add task

? Review launch checklist

? Book dentist appointment

?? Insights

A quick view of momentum.

3 Completed

1 Remaining

? 1 Priority

?? Settings

Appearance

System [ON]

Light [OFF]

Dark [OFF]

?? Task Details

WORK

Review launch checklist

Edit task

Delete task

? Add Task

Inline form: Task name, Project, Due, Save task. The panel opens without losing the Home context.

?? Light and ?? Dark mode

The same screen layout adapts its color system app-wide.

?? Light mode

Light background

Dark readable text

Purple progress

White task cards

?? Dark mode

Dark background

Light readable text

Purple progress

Dark task cards

?? Appearance switches

Each row has an on/off switch. Turning one on turns the other two off so exactly one appearance is active.

?? Gestures, feedback, and adaptive UI

?? Gesture 1 ? Double tap

Double tap a task card to mark it complete quickly.

? Gesture 2 ? Long press

Long press a task card to toggle its priority star.

?? Gesture 3 ? Pull to refresh

Pull down on the Home list to show refresh feedback.

? Animation feedback

Cards fade in; pressed cards scale; the checkmark pops; the progress bar animates; the Add panel slides/fades; and the + rotates toward an X.

?? Adaptive UI

On narrow screens, Insights cards stack vertically. At 650px or wider, they become a horizontal row and content stays centered.
